

# TUCEL® KEEPS OUT BACTERIA, MILDEW AND MOLD!

## QUALITY ASSURANCE

In today's manufacturing world, ideas, materials, technology and consumers' needs are constantly changing. Tucel has surpassed other brush and broom manufacturers with 100% recyclable products, new designs and durable "fused brushware"™.

Tucel has gone beyond the janitorial and sanitary/maintenance industry's standards by offering complete color coding, fused brush and broom configurations, bacteria resistant filament and non-porous molded blocks.

All Tucel's products are manufactured utilizing FDA approved polypropylene resins and colorants, the strictest EPA criteria and a TQM program which provide for ultimate QUALITY. The user gains hygienic cleaning effectiveness every time a TUCEL® FUSED BRUSHWARE™ brush or broom is used.

Tucel's dedicated customer service team is able to answer any inquiries you may have and give you any assistance and/or information concerning our TUCEL® FUSED BRUSHWARE™, TUCEL® HYGIENIC FUSEDWARE® and custom designed fusedware™.

TUCEL'S BRUSHES AND BROOMS ARE RECYCLABLE

TUCEL INDUSTRIES, INC. • APR 2008

Tucel has paved the way for manufacturing brushes and brooms throughout the world for over thirty years with its patented TUCEL® tufting process. This method, especially, as we approach the twenty-first century, proves to be the most significant improvement in cleaning tools, since less raw materials are used, all product is chemically recyclable, withstand all chemical cleaning solvents and compounds and have no places for bacteria and pathogenic substances to collect.

Tucel currently has been granted over thirty U. S. Patents for fusing and brush design products as well as foreign patents. Combining Tucel's patents, ideas and the computer, today cleaning products can be designed to keep out bacteria and not cross-contaminate for safe food•prep and consumption.

The above x-ray of three different utility scrub brushes illustrates the differences between Tucel's fused construction, whereby there is no metal elements holding filament to the block, whereas there are metal staples holding filament within drilled holes in the other two brushes. Holes harbor bacteria! (Remco and Sparta brushes purchased from Nelson/Jameson, Inc.)

Tucel® and Hygienic Fusedware® are keeping the world free of bacteria, pathogens and allow safe, sanitary HACCP cleaning.

- SANITARY MAINTENANCE
- INFECTION CONTROL
- FOODSERVICE
- JANITORIAL
- HACCP COMPATABLE
